

Hydraulic Gritter Model – IHG-1

Description

Front mounted gives weight to the driving wheels. A hydraulically driven salt spreader/gritter for use with forklift trucks, with conveniently placed fork pockets which allow attachment to the lift tines in a safe and effective manner. It is hydraulically driven from the forklift truck's third service valve or side shift valve.

Fitted with the 'POZI-FEED' stainless steel double auger system which can spread all types of salt, wet or dry, brown or white, with a 0.20m³ hopper capacity to take approximately 250kg of salt.

Model	Nominal Capacity (m ³)	Capacity (kg)	Length (mm)	Width (mm)	Height (mm)	Weight (kg)	C of G (mm)
IHG-1	0.20	250	1270	890	810	136	550

Standard Features

- Hydraulically driven stainless steel disc.
- Manually adjustable spread width valve from 1.3m to 9m dependent on material.
- Fluorescent markings on the side/front mounted black chevrons.
- Flat mesh top, complete with access hatch.
- Fork pockets with heel pins for safe mounting.
- Hydraulically powered from the forklift truck's hydraulic.
