TTG 'HORIZONTAL FLANGE' GIRDER STACKING CLAMPS

The TTG girder clamps are designed for transporting girders in the 'I' configuration / position (see photograph on the right).

These are ideal for use within steel stockholders. Once offered up to the horizontal flange of the girder they are locked in place by the jaw locking lever.

The design allows the clamp to be used individually, however for longer girders they should be used in pairs in conjunction with a spreader beam.
